Education

University of California, Irvine
Master of Computer Science

Expected 2028

California State University, Fullerton
Bachelor of Science in Computer Science

May 2025

Technical Skills

- **Programming Languages:** Go, JavaScript, TypeScript, SQL, Python, C++, C, Kotlin
- **Frameworks/Libraries:** React, Next.js, Node.js, Express, FastAPI, TensorFlow
- **Tools & Platforms:** Git, AWS, Docker

Work Experience

Lead Research Assistant

June 2024 - July 2025

Supportive Housing Project

- Led a 5-engineer team implementing scrum and CI/CD practices to deliver an IoT system including a full stack application serving over 30,000 residents.
- Delivered a demonstration of the IoT platform and co-authored documentation raising over \$1.2 million in funding from the National Science Foundation.
- Built and maintained Node.js/Express Rest APIs for the Smart Hub application for use by housing providers and residents including role based access control and authentication.
- Developed C++ firmware for ESP32 for SmartPill, SmartPot, and SmartMotion devices achieving latency below 250ms.

Projects

Personal Injury Sync | Go, React, TypeScript, PostgreSQL

Dec 2025 - Present

- Developed a full stack Go and React application to streamline personal injury workflows between law firms and medical providers reducing communication delays and response times by 50%.
- Built a backend in Go supporting the secure exchange of PHI while maintaining HIPAA compliance.
- Designed relational data models in PostgreSQL and improved performance through indexing and query optimization, reducing response time for common queries to below 200 ms.

Chess Board Recognition | Python, OpenCV, TensorFlow, React, Node.js

Aug 2024

- Built a full stack application integrating a TensorFlow model and OpenCV for chessboard image analysis, allowing users to go from an image of a position to analysis with an engine in under 1 second.
