Education

California State University, Fullerton

Completed May 2025

Bachelor of Science in Computer Science

Major GPA: 3.92

Work Experience

Lead Research Assistant

June 2024 - July 2025

Supportive Housing Project

- Built and maintained a secure REST API (Node.js/Express) with authentication and role-based access control
- Led a 5-engineer team to deliver an Android (Kotlin) + IoT system serving over 30,000 residents
- Contributed to securing \$1.2M+ in funding from the National Science Foundation
- Developed C++ firmware for ESP32/Arduino devices, improving device-to-app latency

Projects

PI Sync | Go, React, TypeScript, PostgreSQL

- Developed a full-stack platform to streamline workflows between law firms and medical providers
- Built a Go backend with authentication and role-based access control supporting multi-user workflows
- Designed relational data models in PostgreSQL and improved performance through indexing and query optimization, reducing response time for common queries

Mastermind Trivia Game | React, Next.js, Typescript, Tailwind CSS, AWS, Python

- Built a real-time multiplayer Next.js web application supporting concurrent users.
- Developed REST APIs using AWS Lambda and API Gateway to manage game state.
- Stored persistent game data in DynamoDB and S3.

Skills

- **Languages:** Go, JavaScript/TypeScript, SQL, Python, C++, Kotlin, Java
- **Frameworks/Libraries:** React, Next.js, Node.js, Express, FastAPI
- **Tools & Platforms:** Git, AWS, Docker
