EDUCATION

California State University, Fullerton
Bachelor of Science in Computer Science

WORK EXPERIENCE

Software Engineer - *Irvine, CA* **September 2026 - Present**
Taxrise

- Develop client-facing and internal applications using Next.js and backend services to streamline tax relief workflows, enabling clients to complete the entire process online.
- Support the migration from Salesforce to PostgreSQL, including redesigning database schemas to reduce complexity and consolidate client data.
- Implement GitHub Actions to track workflows touched by each pull request, streamlining the QA and validation process.
- Maintain tooling for client-facing AI agents including text and voice agents through ElevenLabs reducing human transfers by 15%.

Research Assistant - *Fullerton, CA* **June 2024 - July 2025**
Supportive Housing Project

- Built and maintained Node.js/Express Rest APIs for the Smart Hub application for use by housing providers and residents including role based access control and authentication.
- Implemented scrum and CI/CD practices including automated unit testing which allowed the team to complete the project ahead of schedule while safeguarding client PHI.
- Raised over $1.2 million in funding from the NSF by co-authoring documentation and presentations.
- Delivered an IoT system including a full stack application serving over 30,000 residents.

PROJECTS

PI Sync **December 2025 - July 2026**

- Developed a full stack Go and React application for law firms to connect with lien providers, track client treatment, and build demand packages to streamline the pre-litigation process.
- Built a backend in Go supporting the secure exchange of PHI while maintaining HIPAA compliance through maintaining access logs and ensuring strict RBAC.
- Designed PostgreSQL schema and improved performance through indexing and query optimization, reducing response time for common queries to below 200ms.

TECHNICAL SKILLS

Programming Languages: Python, Go, SQL, TypeScript, C++, Kotlin
ML/AI: TensorFlow, LangChain, LangGraph, OpenCV, Elevenlabs
Frameworks/Libraries: FastAPI, React, Node.js, Express, Next.js
Tools & Platforms: Docker, Git, Linear, Terraform, EKS
